> Product categories:

- Passenger elevator: Elevator culture is the real slection of integration of technology and life.
 KOYO passenger elevator has integrated technology into life, transferring the sense of life to enhance humanity space.
- Villa elevator: What you choose is not elevator, but the pursuit of excellent life. KOYO brings you the final touch of quality life and it is a master piece to enlight your extraordinary life, worth for century collection.
- 3. Panoramic elevator: With your reliance, your potential noble and elegance life starts to be blooming at the moment of you stepping into KOYO space. It is suitable to be installed in hotel, shopping mall and high rise office building etc.

- 4. Hospital elevator: Committed to enlighten the brilliance of life, create the life miracle. What else can rival with KOYO's reliablility, safety and stability.
- Freight /Car elevator: Bigger load and space, constructed by real authentic material. Specially designed for transporting goods and car.
- Small freight elevator: Used for transporting books, food and other small goods. It is suitable for canteen, restaurants, nursery and library.
- 7. Escalators(inculding passenger conveyor): It is not only the reliable and comfortable transportation tool, but also a piece of beautiful art in space. What KOYO brings you can always exceed your expectation. you will find it is worth for the little extra pleasure in life.
- 8. Car parking system: In KOYO, there is no low space, no solid barrier, KOYO can transfer any space to the ever-changing three-dimensional parking space.

> KOYO Advanced Technology

 Non-weighted and high degree of accuracy for compensation, automatic calculation of control system, no need to adjust weight values frequently.

Adapt international standard, the design is more rational, humanized much safer and is much easier to install.

3.With Permasyn motor, it is lubrication-free. The lift can be more smooth and stable. It's also more environmental friendly, could save 40% energy.

4.With foam design ,the car is anti-noisye so that the lift is much quiter and more comfortable.

5.The control system is compatible with GSM mobile phone and SMS message, when the elevator is faulty, the control system will advise maintenance technician automatically.

6.The control board is designed strictly according to European Standard, it is much easier to distinguish high voltage, low voltage and safety circuit during maintaining.

With duel VVVF, elevator is much more energy-saving, much more comfortable, much safer and much more credible.

8.The mainboard installed with bigger LCD screen, which can obtain more comprehensive contents; simple parameters setting and the interface could be switched between Chinese and English easily.

9. Safety and inspection system: Use two fully isolated single loop to control and monitor.
